## GAZETTEER OF NEW YORK LAKES.

Compiled by Edward M. Douglas.

It is believed that the following list includes all lakes, ponds, and reservoirs lying wholly or partly in the State of New York for which names are given on the maps published by the United States Geological Survey and which have areas of 0.01 square mile or more.

The figures given for area are subject to errors from three sources-- (a) errors in the plotted outlines of the water bodies as shown on the published maps (scale 1: 62,500); (b) errors in the planimetric measurements, which should not exceed 1 per cent except for areas of a quarter of a square mile or less, which may be in error by 0.01 square mile; and (c) blunders. It is probable that among so many figures some may be wrongly copied; it is hoped, however, that errors from this source are comparatively few. The compiler will be glad if he is notified promptly of errors or omissions.

Islands are included as part of the water areas.

Elevations are given in feet above mean sea level and are those printed on the maps or estimated from the nearest contour line. The estimated elevations always end in 5 or 0, and may be 10 feet in error.

The latitude and longitude of the center of each water body are given to the nearest half minute. These figures will be found useful in locating the area on State maps.

For convenience in indexing the proper name for a lake is always given first, even though in conversation the word "lake" precedes it. For example, Lake Ontario is indexed as Ontario Lake.

A name used for many different bodies of water--Mud Pond, for example--is indexed first in order of the name, second by county name, and third by quadrangle or map name.

See page 44 for summary.

Washington, D. C.,

August, 1926.

Champlain Lake:						
Lake Champlain is on the boundary line between New York and Vermont and extends northward into Canada for a distance of about 5 miles.						
Its greatest length from Whitehall northward to the northern shore of Missiquoi Bay is 107 miles. Its greatest width is about 12 miles and the greatest depth of record is 393 feet at a point about $1\frac{1}{2}$ miles southeast of Essex, N. Y.						
The area of the surface, including all islands, is:--in New York State, 151 square miles; in Vermont, 322; in Canada, 17; total, 490 square miles. The elevation of the water surface is 95 feet above mean sea level. Combined area of largest 12 islands is 55 square miles. Water surface, <u>excluding islands</u> , 435 square miles.

## New York Lakes.

Name	County	Quadrangle	Lat.	Long.	Area	Elev.
<b>Erie Lake:</b>						
Lake Erie borders on the State of New York for an air line distance of 64 miles. Extreme length 241 miles, greatest width 57 miles, area in United States 4,970 square miles, in Canada 4,940, total 9,910 square miles. Mean elevation of water surface 572 feet, maximum depth of record 210 feet. Discharge through Niagara River at normal stages 207,000 cubic feet per second. Increase in discharge per foot rise in lake level 22,100 cubic feet per second.						
Volume of water estimated at 119 cubic miles. A change in level of one foot changes volume nearly 2 cubic miles.

## New York Lakes.

Name	County	Quadrangle	Lat.	Long.	Area	Elev.
			o ' "	o ' "	Miles	Feet
Ontario Lake.						
Lake Ontario forms the northern boundary of New York for an air-line distance of 146 miles. Extreme length of lake, 193 miles, greatest width, 53 miles, area of surface, 3,470 square miles in United States and 3,864 in Canada, total, 7,334 square miles. Mean elevation of water surface, 246 feet, maximum depth of record, 738 feet. Discharge through St. Lawrence River at mean lake level, 240,000 cubic feet per second. Increase in discharge for each foot rise in level, 21,500 cubic feet per second.

## SUMMARY

There are 2,295 lakes, ponds, or reservoirs listed on the foregoing pages. Of these 375 have an area of approximately 0.01 square mile each, which is equivalent to a circular body of water 600 feet in diameter, and 78 have an area of one square mile or more. Four of these are only partly within the State boundaries.

Lake Erie is the largest, with an area of 9,910 square miles. Ontario is next, with 7,334 square miles. Champlain is third, with a total area, including islands, of 421 square miles. The largest lake wholly within the State is Oneida, 79.8 square miles.

Wallface Pond in Essex County is credited with the greatest altitude, 3,045 feet above sea level.

The name most frequently used for a pond or lake is "Mud," which appears 71 times. "Little" forms part or all of the names of 60 lakes or ponds; "Long" is the name for 43; and "Round" is used to designate 32 bodies of water, none of which is more than approximately circular. "Bear," "Beaver," "Cranberry," "Loon," and "Twin" are other common names.

A map of any of the quadrangles named can be purchased from the Director of the U. S. Geological Survey, Washington, D. C., for 10 cents a copy or \$3.00 for 50 copies.
